

SUJOY SADHUKHAN

Student

✓ Cover Letter

Dear Sir/Madam,

I am Sujoy Sadhukhan, currently pursuing a Bachelor of Computer Applications (BCA) at Eminent College of Management and Technology (Batch 2024–2028). With a deep interest in computer science and data manipulation, I am writing to express my enthusiasm for opportunities that would allow me to develop practical experience in the field of data science.

From a young age, I have been captivated by the structure and patterns hidden in data and the fascinating way data powers decisions in the real world. My academic journey—from primary education to my current undergraduate studies—has steadily built my foundation in programming and analytical thinking.

In addition to my academic pursuits, I enjoy writing and listening to stories, especially those involving virtual worlds and games. This blend of logical reasoning and creativity drives my curiosity to understand both structured and unstructured data at a deeper level.

While I may not yet have formal work experience, I bring a strong will to learn, a natural curiosity, and a disciplined approach to tasks. My future goal is to pursue higher education in data science and become a contributor to solving real-world problems through data.

Thank you for considering my profile. I would be honored to further discuss any opportunity to grow and learn under your guidance.

Sincerely,

Sujoy Sadhukhan
